Name: WinMilk

Version: 1.2

Test ID: 16637

Submission Date: 11/15/2010   4:54:02PM

Application Test Details

Testplan(s): Baseline, Networking

Language(s): English, Spanish

Result: FAILED

Application: File.zip

Technical

5.2 Performance and Resource Management

5.2.4.c

Requirements

If the current page displays a context menu or a dialog, the pressing of the Back button must close the menu or dialog and cancel the backward navigation to the previous page.

Expected Result

Test Process Required:
1. Launch the application.
2. Navigate through the application.
3. Bring up a context menu or a dialog.
4. Select the device Back Button.
5. Ensure the menu or a dialog in focus is closed, and returns the user to the screen where the menu or the dialog was originally opened.

Comments: The application displays a context menu when the user selects the list for the new task. While this context menu is open, pressing the device's back button does not close the context menu and cancel the backward navigation to the previous page.

Steps to reproduce:

1. Launch the application.

2. Select "+."

3. Select "advanced."

4. Select the "List" input box. Notice that the application displays a context menu.

5. Press the device's back button.

6. Notice that pressing the device's back button while the context menu is open does not close the context menu and cancel the backward navigation to the previous page.
